A Workshop titled "Developing Education through Artificial Intelligence"

The Deanship of Student Affairs at Al Ain University (Abu Dhabi campus), in collaboration with the College of Education, Humanities, and Social Sciences, organized a workshop titled "Developing Education through Artificial Intelligence," presented by Professor Mohammed Hassan to the students of the Educational Diploma program.

The workshop aimed to highlight the potential of artificial intelligence in the field of education and how these modern technologies can improve the quality of education and enhance student engagement. It included an introduction to the concept of artificial intelligence and its applications in education.

The workshop program covered key topics such as personalized learning, intelligent assessment, and interactive lessons. It also explored the promising opportunities that artificial intelligence offers for improving access to educational resources.

The event saw significant interaction from students, who showed keen interest in the topic and participated in engaging discussions. They raised numerous questions about the applications of artificial intelligence in education and the challenges ahead.

The Deanship of Student Affairs hopes this workshop will be the first of many future events that support innovative and advanced education at Al Ain University.
